# **INTRODUCTION & OBJECTIVE**

## **Introduction**

AI Quiz Generator is a Python-based terminal application developed to automate the process of asking quiz questions, checking answers, calculating scores, and displaying final results. The project provides an interactive quiz experience using Python fundamentals and file handling concepts.

## **Objective**

The main objective of this project is to understand and implement basic Python programming concepts such as:

- **File Handling**
- **Conditional Statements**
- **Loops**
- **Functions**
- **User Input Handling**
- **Random Question Generation**

The project also demonstrates a simple AI-like workflow using automated quiz processing.

## TECHNOLOGIES, MODULES & WORKING

### **Technologies Used**

- Python
- VS Code

### **Python Modules Used**

- random
- os

### **Project Files**

- quiz.py → Main Python program
- questions.txt → Stores quiz questions and answers
- scores.txt → Stores user scores
- README.md → Project documentation

### **Working of the Project**

1. Questions are stored in a text file.
2. The Python program reads all questions.
3. Questions are shuffled randomly.
4. User answers are taken as input.
5. Answers are validated.
6. Scores are calculated.
7. Final score is displayed.
8. Scores are saved into scores.txt.

🤖 Welcome to AI Quiz Generator 🤖

=====

What is 225 + 225 ? : 450

Correct✅

What is Python? : Python is a programming language

Correct✅

Which political party is currently ruling in India ? : BJP

Correct✅

Who is the Prime Minister of India ? : Rahul Gandhi

Wrong❌

Correct Answer: Narendra Modi

Who developed Copilot ? : microsoft

Correct✅

Full form of AI? : Artificial Intelligence

Correct✅

Full form of ML : Machine Learning

Correct✅

Who developed chatgpt ? : OpenAI

Correct✅

Who developed Gemini ? : Google

Correct✅

Gen AI is not a subset of AI (True / False) ? : True

Wrong❌

Correct Answer: False

🏆🎉 Your Final Score is: 8 /10 🌟🌟🌟
